Product Selector Guide

Clay and Concrete Tiles - Strength in Design and Durability

Concrete Tile

Design/Style

Our concrete tile offers an extensive range of styles and colors to compliment any architectural design. From traditional Spanish barrel tile profiles, to low-profile shake and slate products, no other roofing manufacturer matches Boral Roofing's extensive selection.

Durability

For over 50 years, Boral Roofing customers have enjoyed the quality and performance of the latest technology and purest materials used to produce concrete tiles that can withstand the harshest of climate conditions.

Performance

Boral Roofing's concrete tiles offer Class A fire-rating, hail resistance*, heat and noise insulation, and withstand winds of up-to 150 mph. Furthermore, we exclusively offer a line of innovative concrete tiles that remove smog and other pollutants from the atmosphere while inhibiting mold and algae growth.

Sustainability

Concrete tile is one of the most sustainable roofing systems in today's market. Not only do we offer a wide variety of energy saving, reflective cool roof colors, our manufacturing process has a small carbon footprint and uses only naturally occurring and abundant resources. Our products contain no chemical preservatives, can substantially reduce energy consumption, and are up to 100% recyclable.

Value

Concrete tile is the most affordable, long-term roofing solution on the market. Not only does Boral Roofing tile deliver long-lasting value, it adds curb appeal and increases property value. Low maintenance, energy-saving and aesthetic appeal make concrete tile the best overall value in roofing products.

Clay Tile

Design/Style

Boral Roofing has the most extensive choice of profiles and styles of clay roofing tiles in the nation, ranging from traditional mission style barrel tiles to flat tiles that deliver the aesthetics of natural slate and wood shake. The unique design of our traditional mission tile allows for a wide variety of installation options including staggering, boosting, serpentine patterns and much more

Durability

Clay tile is known for its long-term durability and longevity by being wind, hail and fire resistant. For Instance: it can still be seen on the Coliseum in Rome over 2,000 years after installation. Boral Roofing's modern manufacturing techniques enhance this durability giving customers a roofing product that's sure to last a lifetime.**

Performance

Boral Roofing clay tile products outperform virtually any roofing product on the market today. Class 1 clay tiles can withstand an array of extreme weather conditions (windy, wet, dry, hot and cold) without losing their beauty and will not fade over time.**

Sustainability

Boral Roofing's domestically produced clay roofing products are the first roof tiles in the world to receive the prestigious Cradle to Cradle Gold certification, insuring they are truly sustainable and will not harm the environment. Our clay roofing products use up to 59% recycled raw materials, are 100% recyclable and come in a wide variety of approved cool roof rated colors.

Value

Clay tile has proven its durability, longevity and aesthetic appeal over thousands of years. Boral Roofing offers a wide range of clay roofing products to fit any budget: from the Mission "S" Tile with easy installation and cost savings, to hand-made, imported Cielo Mission tile, Boral Roofing has a clay tile roofing product to meet any project's style and budget.
