

# 7/8" CORRUGATED

Rustic Metal Roofing in a 7/8" deep corrugated profile is our most popular panel. It has the classic look of a turn of the century mining town roof. This rusted metal roofing is stronger than the standard 1/2" Corrugated. In addition, its deep corrugations provides a bold aesthetic shadow effect. Its unique look and naturally oxidizing finish provides a beautiful color and texture. It is the ultimate no care product because no one ever has to paint or scrape rust. This rustic roofing is available in 22 Gauge A606 Type 4 Finish (commonly referred to as Corten) or 22 Gauge Bare Cold Rolled.

*It can be shipped anywhere in the country very inexpensively on one of our route trucks.*

## FEATURES

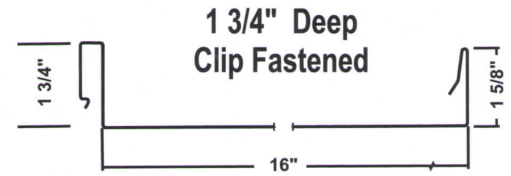

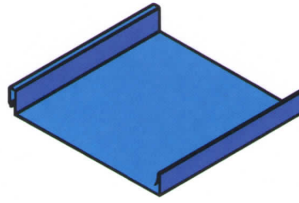

- 22 Gauge Steel
- 7/8" Corrugated has a unique look and naturally oxidizing finish that make it especially desirable for many architectural projects.
- A606 (commonly referred to as Corten) has superior corrosion resistance over bare cold rolled steel.
- Matching trim and flat stock available.
- Painted screws in a Koko Brown finish are available.
- Fiberglass skylight panels are available to match this profile.

## RECOMMENDATIONS AND CAUTIONS

- Rustic Corrugated performs best in environments with low humidity
- Minimum roof slope 3:12 recommended for rusted corrugated.
- Not recommended near salt spray environments and frequent rain locations as it will shorten the life expectancy of the products.
- Acid washing will degrade steel performance.
- Rust runoff will likely stain the surrounding surfaces.
- **NO WARRANTIES FOR THESE PRODUCTS**

Standing Seam Roofing is a clean looking roofing with a concealed fastener system. Its unique look and naturally oxidizing finish provides a beautiful color and texture. Rusted standing seam is the ultimate no care product because no one ever has to paint or scrape rust. Standing seam roofing is available in 22 GA A606 Finish (Commonly Referred to as Corten)

Unlike many other manufactures our panels come with stainless steel clips and screws which is important in increasing the longevity of corten standing seam products. Clips and screws that are done in galvanized run the risk of corrosion in the long term due to the copper content that is present in corten. When you buy your rusted standing seam from us you are dealing with experts that will sell you better product at a lower price.
